DBI Lab 004 - Further SQL Feedback

COMP1048 - Databases and Interfaces

Dr Matthew Pike & Prof Linlin Shen

In general the class completed the lab task well. There were however common issues:

- **AGAIN!** - Please take pride in your work! All documents submitted for assessment (regardless of credit, module or size/difficulty) should be professionally presented and include:
  - A title
  - Your Name
  - Your details (email, student id etc)
- **AGAIN!** - Don't submit screenshots of code. Submit the code itself.

- Some of you are clearly using graphical tools to complete the tasks. It results in very poor quality code with obvious issues/errors. There is a reason why you are asked to complete the tasks using text editor and a command-line interface, it's to avoid mistakes like this:

```
INSERT INTO Movie VALUES(4,3,'Freeway of Love',9.9900000000000002131,2018,'Drama');
INSERT INTO Movie VALUES(5,4,'I knew you were waiting for me',12.25,1997,'Comedy');
```

- A number of careless errors are present in queries. Please check you submissions before submitting. Example:

```
... WHERE mvGenre = 'Adventute'
```
